

Making memes is child's play!

Step 1: go to a meme generator. Let's take <https://imgflip.com/memegenerator> as an example.

Step 2: in the top right corner you get two choices: 'upload your own template' which allows you to work with your own pictures, or 'search all memes'. If you type in key words in the search box, it will direct you to existing memes. The most popular templates are always on display. Let's try typing in 'Yoda'. You immediately get a series of examples to choose from.

The screenshot displays the imgflip.com meme generator interface. At the top, there is a search bar with the text 'Yoda' entered. Below the search bar, the page is divided into two main sections: a left sidebar and a right main content area.

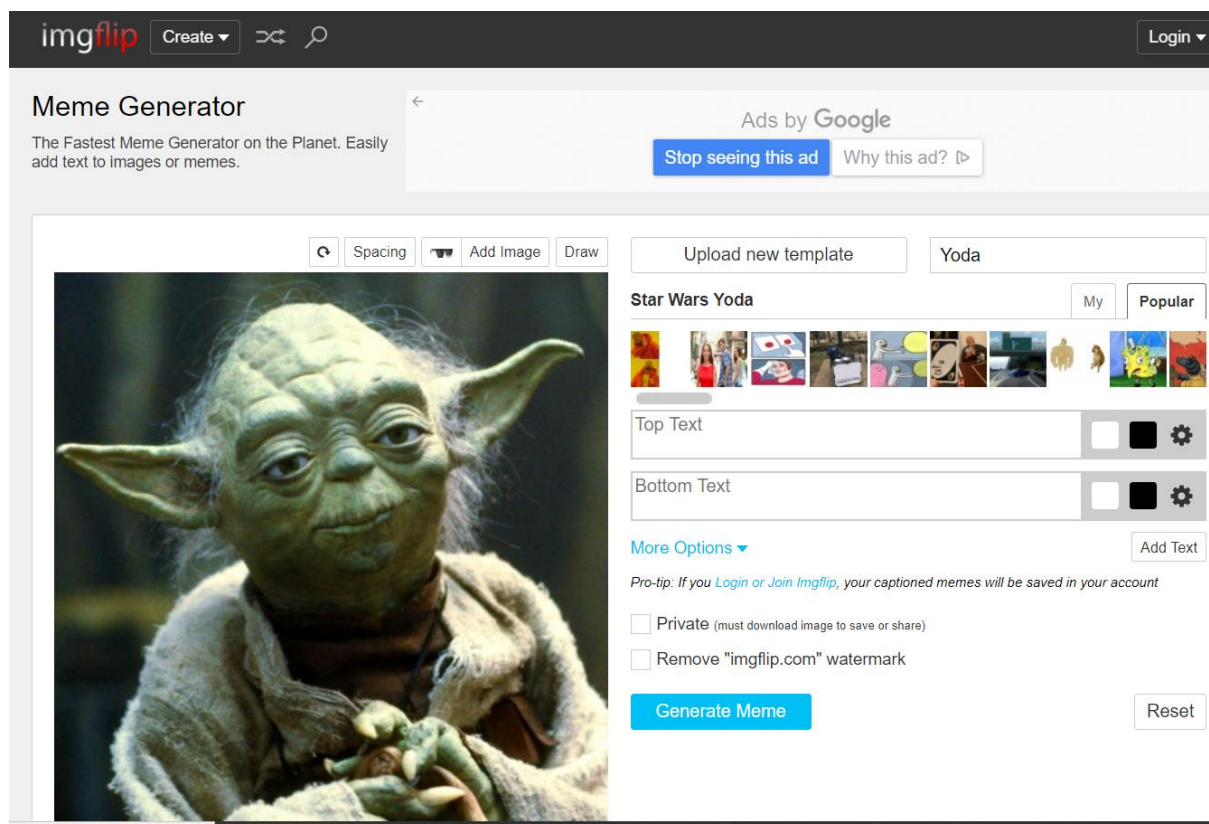

Left Sidebar:

- Buttons: 'Upload new template', 'Generate Meme' (highlighted in blue).
- Section: 'The Scroll Of Truth' with a scrollable list of template thumbnails.
- Text input fields: 'Text #1', 'Text #2'.
- Section: 'More Options' with a dropdown arrow.
- Pro-tip: 'Pro-tip: If you Login or Join In...'
- Checkboxes: 'Private (must download in...)', 'Remove "imgflip.com" watermark'.
- Advertisement: 'muga (online multiplayer games)' with a small image.

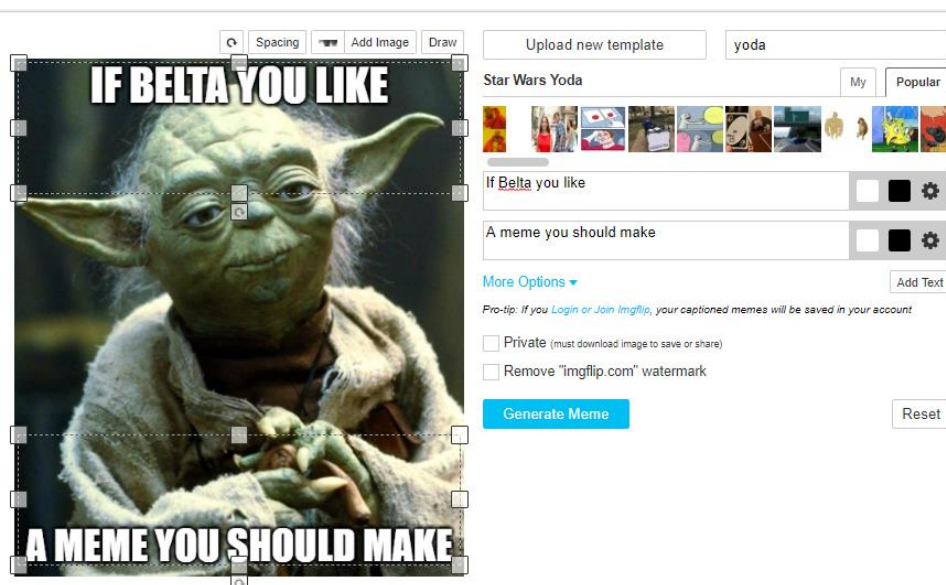

Right Main Content Area:

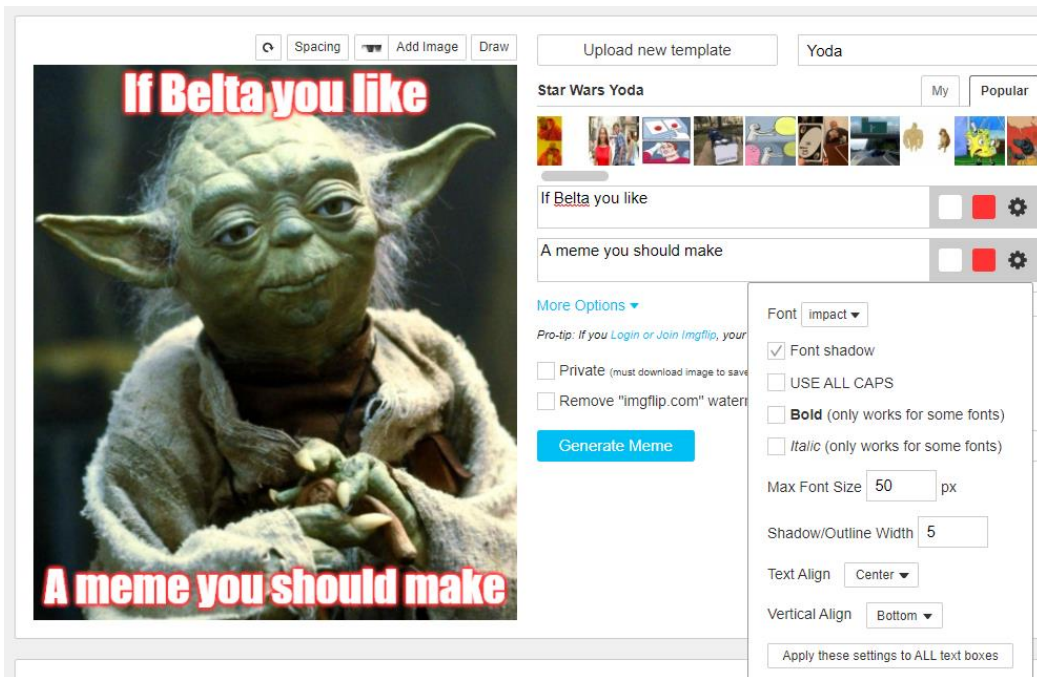

- Checkbox: 'Include NSFW'.
- Section: 'Featured Memes' with a list of results:
 - Star Wars Yoda
 - Advice Yoda
- Section: 'User Templates' with a list of results:
 - Baby Yoda
 - yoda
 - BABY YODA TEA
 - yoda
 - Surprised Baby Yoda
 - Baby yoda cry
 - Baby Yoda
 - yoda smell
 - Sipping animated
- Button: 'View All Meme Templates' at the bottom.

Let's click on **Star Wars Yoda**, and see what happens: Yoda now appears in the left box.

Step 3: fill in the top text and the bottom text in the boxes on the right: the text will appear in your meme. By clicking on the icons next to the text boxes you can change the font and colour, change capital letters etc....see second example in red

Step 4: When you are happy with your creation, click on generate, and your meme appears. Save it, and you're ready!
